501st dB Collections provides a unified and easy-to-use framework for managing contents of all kinds related to 501st merchandises.

Main Features:

The website is mainly dedicated to help members :

- * Keep trace of their collections (have list),
- * Simplify their trading activities (want/trade lists),
- * Keep an online archives of 501st merchs (thru a dedicated 'ARCHIVES' user),

All functionalities available on Legion Boards have been developped and enhanced when possible (Display my want/need etc.),

Those functionalities are available thanks to :

1. Advanced data edition features and rich GUI layouts :User friendly interface with advanced capabilities

- * Display data in grids,
 - * Filters / Sort Data and row counting (total of rows accounting pre-selected filters),
 - * Pagination Management
 - * Data Editing with filters to get quick data access

2. Based on completely database driven site engine,
3. E-mail a friend and Print format available for every Article (news feed),
4. Take into account user feedbacks and any suggestions to improve the use of the DB,
5. Roadmap (ex : addition of charts to display some interesting statistics - top 10, monthly stats etc., Visitor map etc.),

Extensive Administration:

1. GUI Component available thru Advanced Control Panel,
